API Quick Guide

Last Updated: 01/22/2020

Product Information

Using the following API, you can gather product information (specifications and images) for a single product, or multiple products at a time.

Suggested API: GetProductCatalog

Note:

- When pulling in product images, we suggest saving the images on your end to minimize load time on your website.

POST https://stage-connect.fiztrade.com/FizServices/GetProductCatalog/42-222a884e6fef409f289c742f0323c459

Authorization | Headers | Body | Pre-request Script | Tests

form-data | x-www-form-urlencoded | raw | binary | Text

```

                "imgPath": "https://azrstgp1.blob.core.windows.net/goldimages/dggold_social2_600x600_jpg"
            },
```

Critical flag. Call only for "isActiveSell": "Y" If "N" Dillon Gage is not selling this item

Product Pricing

Using the following API will allow you to pull in pricing for multiple products.

Suggested API: **GetPricesForProducts**

Note:

- The API will return four tiers of pricing for each product. Dillon Gage currently only uses Tier 1; disregard other tiered pricing.

<u>Sample:</u>

POST https://stage-connect.fiztrade.com/FizServices/GetPricesForProducts/42-222a884e6fef409f289c742f0323c459

Authorization Headers Body Pre-request Script Tests

form-data x-www-form-urlencoded raw binary Text

```
["DGGOLD","1EAGLE"]
```

Body Cookies Headers (12) Test Results

Pretty Raw Preview JSON

```
[
    {
        "tiers": {
            "1": {
                "bidPercise": 1205.7,
                "spread": 11,
                "melt": 1,
                "askPercise": 1216.7,
                "ask": 1216.7,
                "bid": 1205.7
            },
            "2": {
                "bidPercise": 1205.7,
                "spread": 11,
                "melt": 1,
                "askPercise": 1216.7,
                "ask": 1216.7,
                "bid": 1205.7
            },
            "3": {
                "bidPercise": 1205.7,
                "spread": 11,
                "melt": 1,
                "askPercise": 1216.7,
                "ask": 1216.7,
                "bid": 1205.7
            },
            "4": {
                "bidPercise": 1205.7,
                "spread": 11,
                "melt": 1,
                "askPercise": 1216.7,
                "ask": 1216.7,
                "bid": 1205.7
            }
```

Use only Tier 1

Tiers 2-4 are not longer valid

Trade Execution

When executing transactions for any product, you must execute the trade within 20 seconds of locking in the pricing. If you exceed the 20 seconds, you will need to lock the prices again.

Locking in Pricing

Calling the LockPrices API, only locks in the pricing for 20 seconds.

Suggested API: **LockPrices**

Sample:

POST https://stage-connect.fiztrade.com/FizServices/LockPrices/42-222a884e6fef409f289c742f0323c459

        }
    ],
    "lockToken": "DemoDealer2-2656815"
}
```

Executing the Transaction

Suggested API: **ExecuteTrade**

Note:

- Addresses provided for bullion products, will need to be the delivery address
- If the address is an international address, provide the customers phone number in Address4

Sample:

POST https://stage-connect.fiztrade.com/FizServices/ExecuteTrade/42-222a884e6fef409f289c742f0323c459

Spot Pricing

You can pull in the Dillon Gage spot price once per second. We would suggest to call in the pricing and cache the data on your servers to pull from on your website.

Spot Prices for all Metals

Suggested API: GetSpotPriceData
